

★ San Francisco VA Medical Center ★

Established in 1934, the San Francisco VA Medical Center (SFVAMC) has a long history of conducting cutting edge research, establishing innovative medical programs, and providing compassionate care to Veterans. The Medical Center has 124 operating beds and a 120-bed Community Living Center. Primary and mental health care is provided at outpatient clinics in: Clearlake, Santa Rosa, Eureka, Ukiah, and San Bruno. There is a specialized homeless veterans clinic in downtown San Francisco.

SFVAMC has several National Centers of Excellence in the areas of Epilepsy Treatment; Cardiac Surgery; Post Traumatic Stress Disorder; HIV; and Renal Dialysis. It has many other nationally recognized programs including: the Parkinson's Disease Research, Education, and Clinical Center; the Hepatitis C Research and Education Center; the Mental Illness Research & Education Clinical Center; and the Western Pacemaker and AICD Surveillance Program. The Medical Center is designated as one of only five VA Centers of Excellence in Primary Care Education. It has also been selected as a Community Resource and Referral Center, one of only 12 locations designed to serve homeless and at-risk for homeless Veterans and their families.

SFVAMC has the largest funded research program in the Veterans Health Administration with \$83 million in research expenditures. Areas of particular interest are: prostate cancer, aging, oncology, cardiovascular disease, HIV, Hepatitis C, breast cancer, PTSD, substance abuse, neurological diseases, health services research, bone disease, and advanced medical imaging. The Medical Center is one of the few in the world equipped for studies using both whole-body magnetic resonance imaging (MRI) and spectroscopy, and is the site of VA's National Center for the Imaging of Neurodegenerative Diseases. Additionally, the San Francisco VA has established a unique partnership with the Department of Defense (DoD) to study the basic neuroscience and neuroimaging of combat-related brain and spinal cord injuries, PTSD and other neurological combat-related injuries and predictors of injuries of war fighters. This program is considered a national resource by the DoD.

The Medical Center has been affiliated with the University of California, San Francisco (UCSF), School of Medicine for over 50 years. All physicians are jointly recruited by SFVAMC and UCSF School of Medicine.

Operating Budget \$493 million
Research Budget \$83 million

Operating Beds 124
Nursing Home Beds 120

Unique Patients 61,367
Unique Women Veterans 2,543

Outpatient Visits Total 537,683

SFVAMC	408,854
Clearlake	5,532
Downtown SF	26,482
Eureka	22,421
San Bruno	10,931
Santa Rosa	44,544
Ukiah	18,928

Inpatient Visits 5,346

Employees 2,079
